DETAILED ACTION

This communication is in response to Applicant's amendment filed on September 8, 2009. Claims 1 and 3-48 are under prosecution in this application.

Response to Applicant's Amendment

Applicants' amendments filed on September 8, 2009 have been fully considered, and discussed in the next section below or within the following rejections under 35 U.S.C. § 103. Applicants' request for allowance is respectfully denied.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent May not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 3691

4. Considering objective evidence present in the application indicating obviousness or unobviousness.

Claims 1, 3-35, 37-42, and 44-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carlisle et al in view of (Derksen and Gungl et al) in view of Electronic Payment Systems as discussed in the previous office action and in further view of Lee et al (US 6003014).

Re claims 1, 3-35, 37-42, and 44-48: Carlisle, Derksen, Gungl and EPS do not explicitly teach a loyalty application for linking a loyalty program to a first electronic application and a second electronic application as recited in the claims. However, Lee teaches the concept of storing (linking) a loyalty application with transit application, stored value application and other applications in a memory (col. 4, lines 35-55). Therefore, it would have been obvious to one of ordianry skill in the art at the time of the invention to modify the combination of Carlisle, Derksen, Gungl and EPS to include this feature as taught by Lee for the obvious reason of utilizing the card for as an all purpose card, thereby enhancing the functionality of the card.

Claims 36 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carlisle et al in view of (Derksen and Gungl et al) in further view of Electronic Payment Systems in view of Lee as applied to claims above, and further in view of Taskett as discussed in the previous office action.

Response to Arguments

Applicant's arguments with respect to claim 1 and 3-48 have been considered but are moot in view of the new ground(s) of rejection.
